Lyndonville

Proposal To Construct Additional Village Reservoir On The Shonyo Brook—Weekly Events.

A special village meeting was held Friday evening to consider the report of the trustees in regard to an additional water supply. The report favors the Shonyo brook, which they think can be the construction of a small reservoir, for which there is an ideal location and without great expense be made available. This will be sufficiently high to reach all the district east of the track and will supplement the present system in times of drought. The East Burke stream and the Sheffield stream were also spoken of, but there were objections to both. The report was accepted and it was voted to have a competent engineer investigate all these sources and make an estimate of the cost of construction, to be reported at an adjourned meeting to be held in two weeks, May 28. L. D. Hall made the village an offer for the large house at the electric light plant which he would like to use as a boarding house. He offered to build the village a small house in its place and one more suitable to their needs. This matter too was laid on the table till the adjourned meeting.

Stop Thief

Isn't it a fact that nine times in ten when you see a man with the pink of boyhood in his face and the vim of boyhood in his manner inquiry shows he doesn't drink coffee?

More and more people every year are getting awake to the fact that coffee is a slow poison that, while it seldom kills, surely robs folks of the buoyancy and robustness of perfect health. More and more people desiring a delicious hot drink with their meals are serving
